

Three Steps you need to take to understanding better health

HEARTSCREEN

SCVC specialise in cardiac conditions, so are well placed to offer screening for people that are worried they may have potentially dangerous heart conditions. If abnormalities are detected, SCVC can then offer information, further tests and appropriate treatment.

All our Heartscreen+ packages uniquely include a report and conclusion by one our cardiologists, who will review all of the information collected following the Heartscreen +. Early diagnosis means potentially saving lives.

BRONZE ▶

SILVER ▶

GOLD ▶

PLATINUM ▶

Please note that our [Heartscreen+ screening](#) packages are designed for patients that have no clear symptoms of heart disease, so we would advise that if you have symptoms of chest pain on effort, heart failure, palpitation or blackouts you should consider being referred by your GP to a Consultant Cardiologist for a formal Consultation and medical examination.

Step 1 select your package- having read our patient information sheets for each

Test/Package	Bronze	Silver	Gold	Platinum
Questionnaire, nurse interview and cholesterol test	✓	✓	✓	✓
12 lead Electrocardiogram (ECG)	✓	✓	✓	✓
Echocardiogram by an Echo Technologist		✓	✓	✓
Exercise tolerance test			✓	✓
Advanced CT Coronary Calcium score				✓
Cardiologist report and conclusion	✓	✓	✓	✓

Step 2 [Send us your details](#) (click on this link)

Step 3 We will then be in touch and ask you to complete our on-line questionnaire

Once we have received your details and Questionnaire we will call or email you to schedule the appointments and take payment for the Heartscreen+ (by Card payment).

None of our Health screening products can be scheduled until payment in full has been made.

Please note that SCVC will make effort to schedule as many components of the heartscreen+ in one session but because CT and Exercise tests do not run every day it is likely that patients having our Gold and Platinum products will need to attend on more than one occasion.

How it works

1. SCVC receives your request for a Heartscreen+
2. SCVC staff will acknowledge the referral and send out a Questionnaire by Email (or for those without email, via surface mail)
3. Once we receive the Health Questionnaire we will contact you to arrange payment and Heartscreen+ appointments. We will also send you details of other tests that you may be interested in having at the time of your appointment- eg PSA, Diabetes screen, advanced lipid testing, Thyroid levels, Serum Testosterone concentration.
4. We will confirm these appointments with you in writing
5. On arrival at SCVC 5 Huxley Road you should park and then obtain a permit from our reception staff (unless already received)
6. Please check it with our receptionist who will check your details and that the questionnaire is completed. If you have a prescription list- please pass to the reception so it can be scanned into your record.
7. You will then see our Nurse who will go through the health questionnaire with you and obtain details on any areas of concern. You will then need to undress to the waist and recline on the couch so that a 12 lead ECG can be taken. For Bronze Heartscreen+ this completes the appointment and you can leave.
8. Your Heartscreen+ will be examined by a Cardiologist along with your details, questionnaire and a report issues within 7 days of the ECG
9. For Silver, Gold and Platinum, other tests will be needed before a single report can be issued, which should be within 7 working days of the last test.
